CAREER DAYS AND CAREER TALKS

Career days and talks help expose students to different careers by allowing them to attend informational sessions, meet professionals in their industry of interest, and ask questions about different career paths.

SUMMER OF WORK AND LEARNING

This program works with area career centers and government funded programs, as well as local high schools and employers to provide students with a subsidized work experience. This programming combines a work readiness curriculum with supervised work experience.

STUDENT INTERNSHIPS

Student Internships combine school-based learning with work-based application, allowing students to develop transferable workplace competencies and skills.

TEACHER EXTERNSHIPS

Teacher Externships offer a unique professional development opportunity, connecting the classroom to the workplace. This experience provides a pathway for teachers to expand their industry-based knowledge and transfer this to their curriculum.

CNA PROGRAM

This is an intensive program instructed by RNs. At the completion of the program, students are qualified to take the CNA State Licensing Exam. Some students have chosen to pursue a nursing degree upon completion, while many others have gained part-time or full-time employment as certified nursing assistants.

JOB SHADOWING

Job Shadowing enables students to spend time observing a professional in their occupational interest area to better understand the field. Employers also get an opportunity to connect with students and meet the workforce of tomorrow.
